

SESSION PLAN

SESSION NUMBER: 1&2	
Session Title: Introduction to Artificial Intelligence and its History (180 mins)	Unit Code: ICT/CU/CS/CC/04/6/MA
Name of Trainer: Nanjakululu Alex	Module: 5
Department: ICT	Level: 6
Number of Trainees: 3	Class: Computer Science
Time: 10:30-13.30	Date: 08/05/2026

Bridge-in (5 mins)

- Engage trainees with a thought-provoking question about the role of Artificial Intelligence in daily life to spark interest.

Learning Outcome:

By the end of the session, the trainee will:

- a. Describe the fundamental concepts and definitions of Artificial Intelligence.
- b. Explain the historical development and key milestones of AI.
- c. Identify the ethical considerations and societal impact of AI development.

Pre-assessment (10 mins)

- Administer a quick poll using a show of hands to gauge prior familiarity with AI concepts.
- Distribute a brief pre-assessment questionnaire on personal understanding of AI history and current impact.
- Collect responses to identify areas needing emphasis during the session.

Participatory Learning

Time	Trainer Activities	Trainee Activities	Learning Aids/Materials
45 min	Conduct an interactive lecture on fundamental AI concepts and definitions, posing questions to trainees.	Engage actively in the interactive lecture, asking clarifying questions about AI fundamentals.	Textbooks on Artificial Intelligence (e.g., <i>Artificial Intelligence: A Modern Approach</i>) Class handouts on AI history and concepts
55 min	Coordinate a group discussion on the historical evolution of AI, guiding trainees to share insights on key periods.	Engage in the group discussion, contributing historical facts and personal observations about AI's evolution.	Class handouts on AI history and concepts
45 min	Lead a brainstorming session on the ethical implications and societal impact of current and future AI technologies.	Contribute ideas and scenarios during the brainstorming session on AI ethics and societal impact.	Online articles and videos discussing AI ethics

Post-Assessment (15 mins)

- Conduct oral questioning to assess understanding of fundamental AI concepts and history.
- Evaluate trainee contributions during the group discussion on AI ethics and societal impact.

Summary/Closure (10 mins)

- Administer an exit ticket asking trainees to write down one key takeaway from today's session and one lingering question about AI's future.
- Collect exit tickets to gauge comprehension and identify areas for future review.
